

DAiTE

AI-Powered Social Healing Platform
Helping Humans Embrace Authentic Connection

Early Investment Opportunity

Revolutionary AI Dating Platform • Proven Founder • Google-Powered Technology

Executive Summary

DAiTE is revolutionizing human connection through sophisticated AI agents that conduct poetic dialogues about compatibility before users ever meet. Unlike superficial swipe-based apps, DAiTE creates "personalized romantic literature" through agent-to-agent conversations, addressing the \$8.2B dating market's core problem: meaningful connection.

Revolutionary Approach

- AI agents write romantic dialogues about users
- Google-powered psychology analysis
- Privacy-first, anti-ghosting design
- Neurodivergent-inclusive platform

Market Advantages

- 75% lower operating costs via Google Cloud
- Enterprise-grade from day one
- Multi-relationship type platform
- Impossible-to-delete user engagement

Key Metrics

\$8.2B
Dating Market Size

75%
Cost Advantage

\$4.8M
Year 1 Revenue Target

Market Opportunity

Dating Industry Crisis

78% of users report dating app fatigue

Superficial swiping creates disconnection

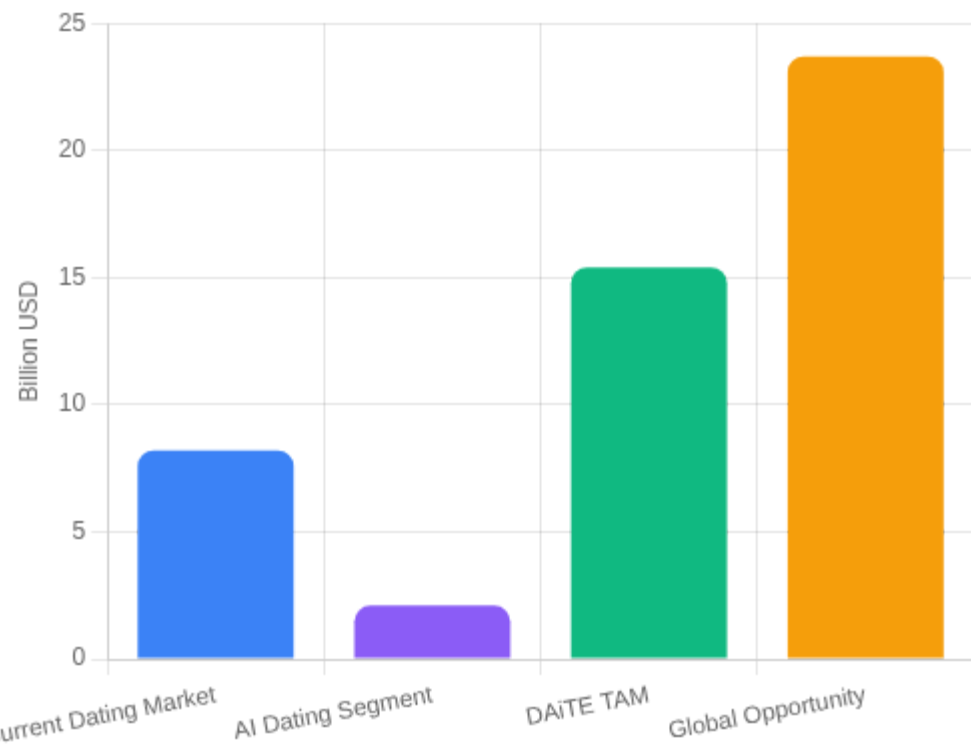

65% of relationships fail within 6 months

Poor compatibility assessment

\$200+ avg user spent on dating apps annually

Low satisfaction, high churn

Market Size & Growth

Revolutionary Solution: CYRAINO

AI Agent Dialogues

Sophisticated AI agents have poetic conversations about their humans, creating beautiful compatibility explanations

Deep Psychology

Gemini Ultra analyzes attachment styles, communication patterns, and values for multi-dimensional compatibility

Personalized Literature

Users receive beautiful "romantic novels" written about their potential connections - impossible to delete content

Sample Agent Dialogue Preview

Agent Elena: "My dear Sarah possesses the rare gift of finding wonder in small moments - she photographs sunrise reflections in coffee cups and writes thank-you notes by hand..."

Agent Marcus: "How beautifully that resonates! My David designs community gardens in urban spaces, believing beauty should bloom where hope seems lost..."

Unfair Advantages

Google Ecosystem Integration

- Gemini Ultra Access**
Most advanced AI reasoning for psychology analysis
- 75% Cost Savings**
\$117,600 annual savings vs traditional infrastructure
- Enterprise Features Day One**
Calendar integration, security, global scaling
- Infinite Auto-Scaling**
Ready for millions of users instantly

Regulatory & Privacy Moat

Founder John Lyman is Utah State Board of Education's Student Data Privacy Specialist, providing unmatched expertise in:

- FERPA compliance and privacy law
- Ethical AI implementation
- Regulatory framework navigation
- Data protection best practices

While competitors face privacy lawsuits, DAiTE is bulletproof from day one.

Proven Founder

John C. Lyman, M.Ed. - Founder & CEO

Professional Background

- Student Data Privacy Specialist, Utah State Board of Education
- M.Ed. Educational Psychology, 25+ years experience
- FERPA & K-12 policy expert
- Wasatch Wise LLC - Multiple ventures

Unique Qualifications

- Educational psychology expertise
- AI strategy & prompt engineering
- Musician & creative (authentic connection understanding)
- Single father (real relationship challenges)

Current Ventures

- Adult AI Academy**
AI upskilling for Gen X/Boomers
- TechNest**
Youth esports & STEM pipeline
- Dublin Drive Live**
DIY media studio

"John represents the rare convergence of deep educational psychology expertise, cutting-edge AI innovation, and regulatory compliance mastery. His unique combination of skills positions DAiTE to build technology that enhances rather than replaces human connection."

Financial Projections

Revenue Model

- Premium Subscriptions - \$29.99/month**
Unlimited AI matching, advanced features, priority support

3-Year Revenue Projection

Year 1

10K Users

\$4.8M

Year 2

50K Users

\$18.2M

Year 3

150K Users

\$42.6M

Exit Potential

10x Revenue

\$400M+

Investment Opportunity

Early Stage Advantages

Perfect Timing

- Dating app fatigue at all-time high
- AI technology mature enough for psychology
- Google ecosystem advantages
- Regulatory expertise advantage

Competitive Moats

- First-mover in AI agent matching
- Privacy law expertise barrier
- Google cost advantages
- Network effects + impossible to delete UX

Why This Matters Now

The convergence of AI sophistication, dating market crisis, and regulatory complexity creates a narrow window for a privacy-expert founder with Google ecosystem access to build an unassailable market position.

Investment Terms

\$500K

Seed Round Target

15-20%

Equity Range

6 Months

Runway to Revenue
